Combustion Safety Controller

Model: ACL 5500

The **ACL 5500 Combustion Safety Controller** is a safe, reliable **Burner Management System** that is designed to ignite and prove a continuous pilot and monitor and annunciate multiple heater shutdowns for all types of natural gas fired heaters and industrial-sized burner applications:

- Line heaters
- Treaters
- Re-boilers
- Dehydrators
- Tanks
- Separators

The ACL 5500 is a key component in a complete system that provides safe, reliable, high efficiency, low NOx solutions which meets the requirements of CSA B149.3 and NFPA 86 guidelines.

ANSI/UL Standard 698 13th Edition Industrial Control Equipment for use in Hazardous (Classified) locations

Approvals

- CSA approved for Class I Div 2 location
- CSA B149.3-20
- C22.2 No 199-M89
- E60730-1-2013
- ANSI Z21.20-2014
- CAN/CSA C22.2 No. 60730-2-5-2014
- Compliant, meets NFPA standards (with IGN400-PM Ignition Module)

Combustion Safety Controller

Model: ACL 5500

Features

NEMA Type 4X enclosure, corrosive resistant and weatherproof

No Programming Required.

Remote Stop and Start capabilities

100% Failsafe design: Ignition Module CSA certified to C22.2 60730-2-2014, ANSI Z21.20-2014

Easily installed with any burner

Flame out response time of < 1 second

Available for 12/24VDC (solar option) and 120/240VAC power supplies

Low power consumption

Single or dual burner operation

Proof of Closure feature

Two solenoid outputs per burner: Pilot, Main, up to 2A each

First out annunciation with LED indication of multiple shutdowns: Flame Fail, Power Fail, Low Level, Remote S/D, Hi/Low Pressure, High Temperature, Proof of Closure.

Allows simple connection to TC200 Temperature controller for temp control and high temp shutdown.

Operational ambient temperature of -40°C to +60°C
